WEBINAR

Post-Brexit procedures, handling
and logistics in Belgian ports

3 December 2020

Agenda

- **New procedures and controls for transport to and from UK**
 - Customs and Excises Department
 - Food Safety Agency
- **Handling sequence of traffic flows and port community systems**
 - Port of Zeebrugge
 - Port of Antwerp
- **Traffic flows and recommended roads to the seaports**
 - Flemish Agency for Roads and Traffic

1. New procedures and controls for transport to and from UK

Customs and Excises Departement

UNACCOMPANIED FREIGHT TRAILER OR CONTAINER

Benefits for Brexit:

- No driver required for crossing → [availability](#)
- Trucks and drivers do not need [licences](#) to operate overseas
- [Space](#) for storage and warehousing
- [Predictable](#) time of delivery
- Direct links to Ireland (no customs formalities)
- Lower risk for congestion

- Requirements:
 - Transport on both side
 - Perishables require conditioned transport
 - [Booking in advance](#)

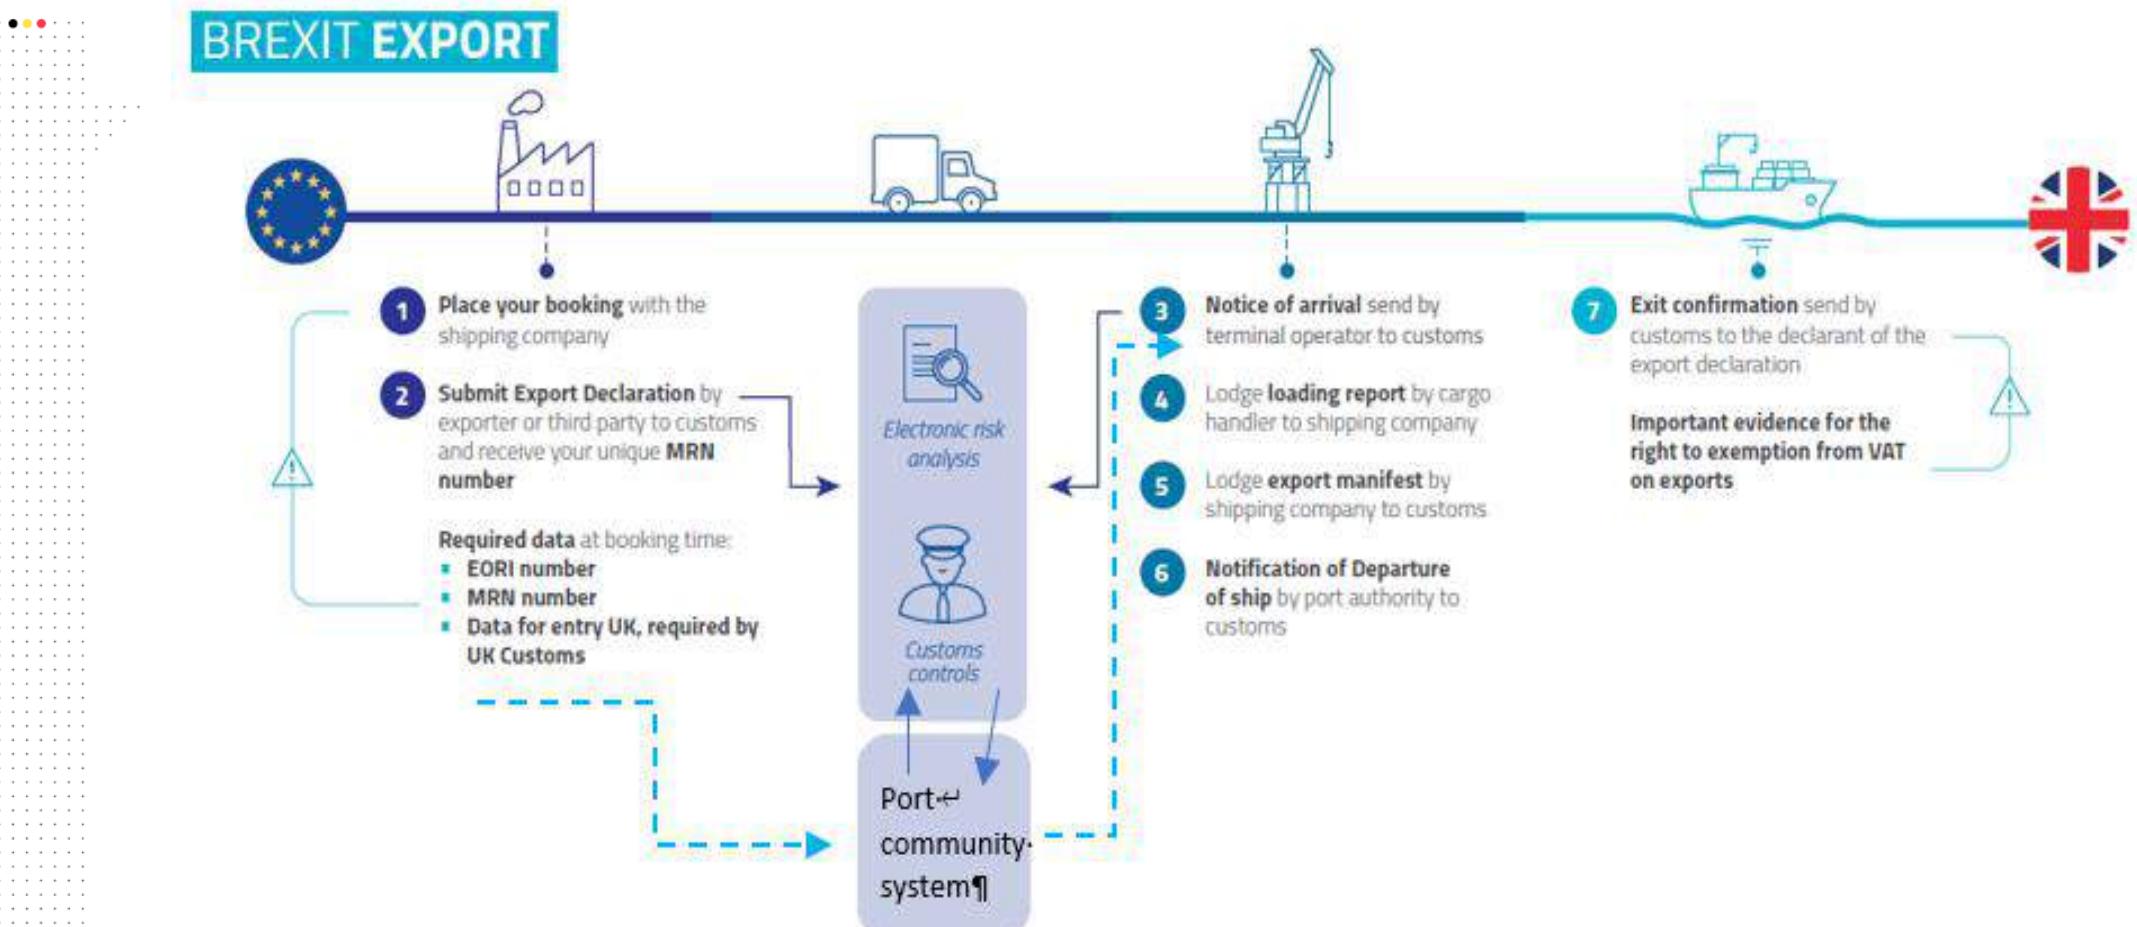

HOW DOES IT WORK?

- ENS is lodged by the carriers
- Possibilities
 - Full declaration (TS procedure)
 - Pre-lodgement using type D declaration
 - Transit procedure
- Short sea container lines in Antwerp and Ghent
- Ro-Ro services (unaccompanied) in Zeebruges

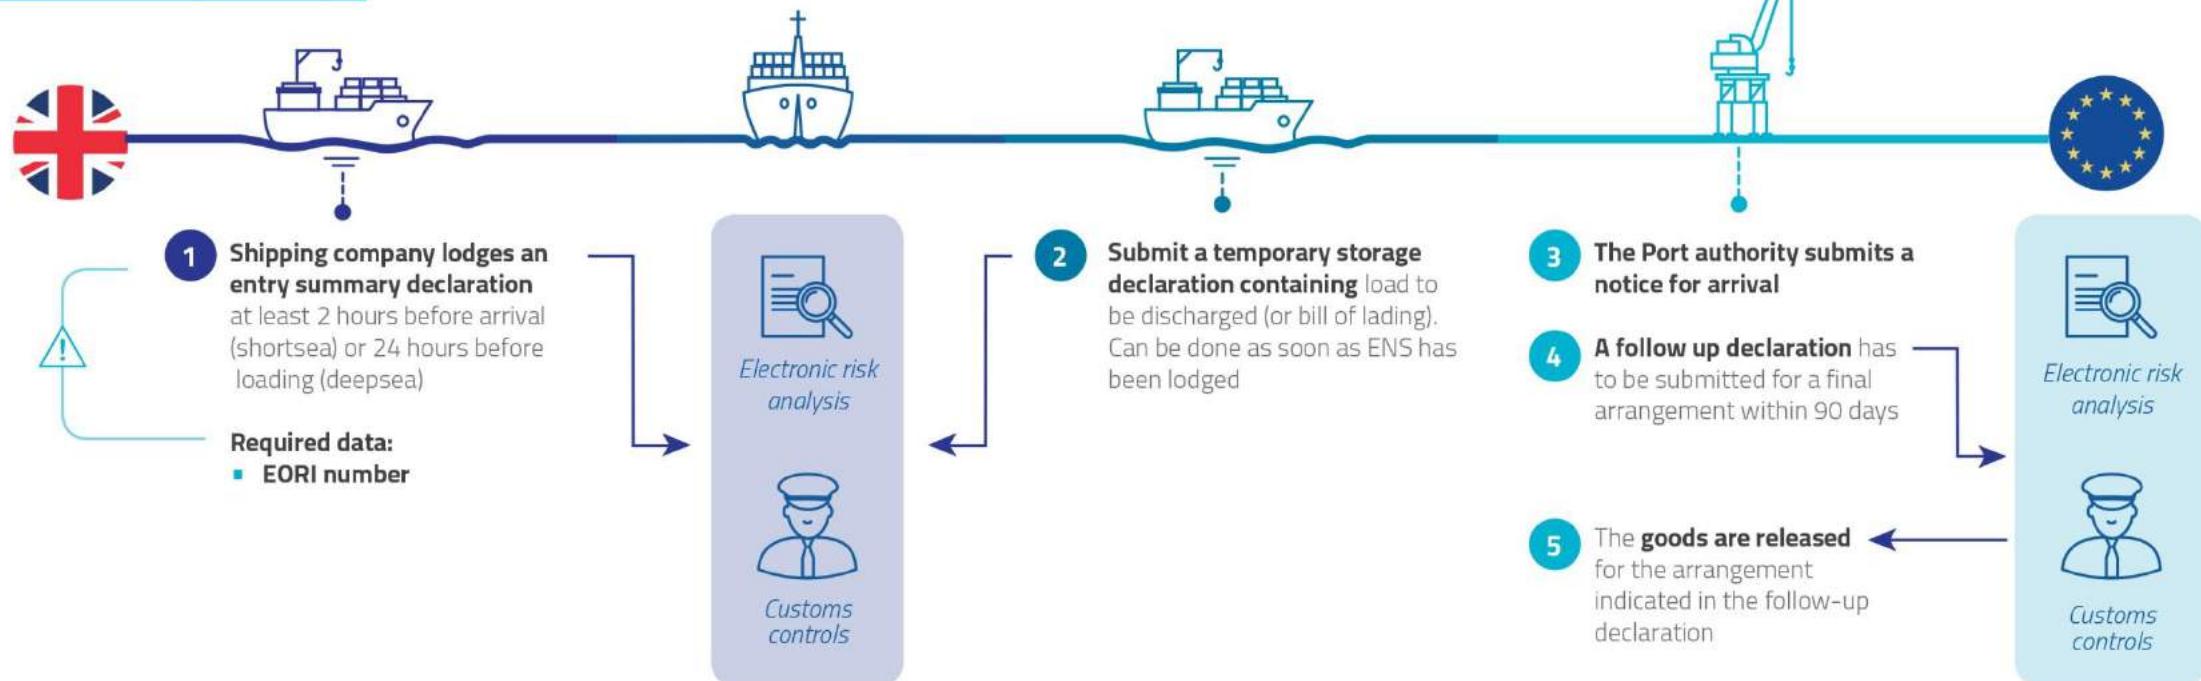

Scheme Export Process

Scheme Import Process

BREXIT IMPORT

EXAMPLE CONFORMITY: PRODUCTS ENTERING THE EU MARKET

- Before placing a product on the EU market, make sure it **complies with the EU technical regulations**.
- Harmonized products: **CE markings** and right documentation.
- Notified bodies: All the products should be certified by a **notified body within the EU**, where applicable.

EXAMPLE CONFORMITY ISSUES: PRODUCTS ENTERING THE UK MARKET

- Harmonized products: **UKCA markings** instead of CE marks;
- Notified bodies: to find in the **UK Database of notified bodies**.

2. New procedures and controls for transport to and from UK

Food Safety Agency

Direktorate-General European Affairs and Coordination (DGE)

.be

FEDERAL AGENCY FOR THE SAFETY OF THE FOOD CHAIN (FASFC)

JAN VAN SEGHBROECK

DVM – EXPERT IMPORT

Import into Belgium

- Implementation of EU legislation
- FASFC = competent authority
- close collaboration with Customs
- high risk products (as mentioned in the OCR) entry only via BCP
designated for the different live animals or goods
- BCP: 4 airports (Brussels, Oostend, Liège, Charleroi) 3 ports (Zeebrugge, Antwerp, Ghent)
- Official certificates need to accompany the consignment (unless e-certification TRACES NT)

Import into Belgium

- mandatory notification in TRACES-NT one working day before physical arrival
- checks (documentary, identity, physical check) in BCP or other control points
- outcome: included and endorsed in CHEC
- e-CHEC possible TRACES NT (smartphone application)
- Landbridge procedure: trade in live animals and animal products with the island of Ireland: use of RX/Seaport tool for registration and origin check (green lane)

Import into Belgium: BCPs

Import into Belgium

- Points of attention for transport
 - (Live animals) products of animal origin always need a full check in the BCP
 - Transport from terminal to BCP monitored by customs
 - CHED with outcome of the check issued by the sanitary authority must be handed over to customs
 - Customs need to give the necessary follow-up

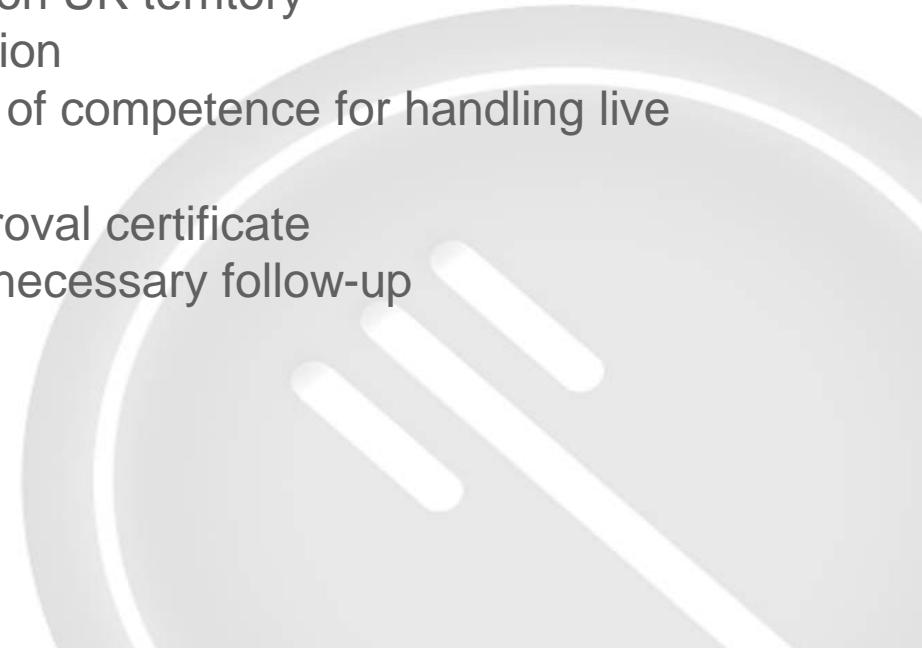

Export from the EU via Belgium

- Implementation of UK legislation
- 3-stages certification: border operating model
- competent authority of different Member States: instructions for certifying officers
- UNN number (live animals, live products, other?) on export certificate
- TRACES foresees in e-certification: decision of UK authority?
- Export via other Member State: intra-trade certificate in TRACES for live animals, live products, certain animal by-products to the exit points issued by the competent authority of the Member State of origin (journey log for live animals)
- No intervention of FASFC unless transport of live animals! via landbridge.

Export from the EU

- Points of attention for transport
 - Live animals always need a check at the exit point of the EU (journey log)
 - Driver continues transport on UK territory
 - ✓ Transporter authorisation
 - ✓ Transporter certificate of competence for handling live animals
 - ✓ Transport vehicle approval certificate
 - Customs need to give the necessary follow-up

The UK is our main trading partner

- 38% or 17.2 million tons in 2019
- 67% export, 33% import
- 70 liner services a week – to different regions in the UK and Ireland
- Hub for new cars: 850.000 from/to UK
(= 30% of total number of new cars)
- 27 % import from UK
- 73% export to UK

Zeebrugge bridgehead for the U.K. distribution

Day A :

14.00 hrs: 'order picking'
in Zeebrugge

Day B :

Delivery in the UK

- 06.00 hrs in London
- 10.00 hrs in Birmingham
- 12.00 hrs in Manchester
- 15.00 hrs in Glasgow

Our strengths

Focus on unaccompanied freight

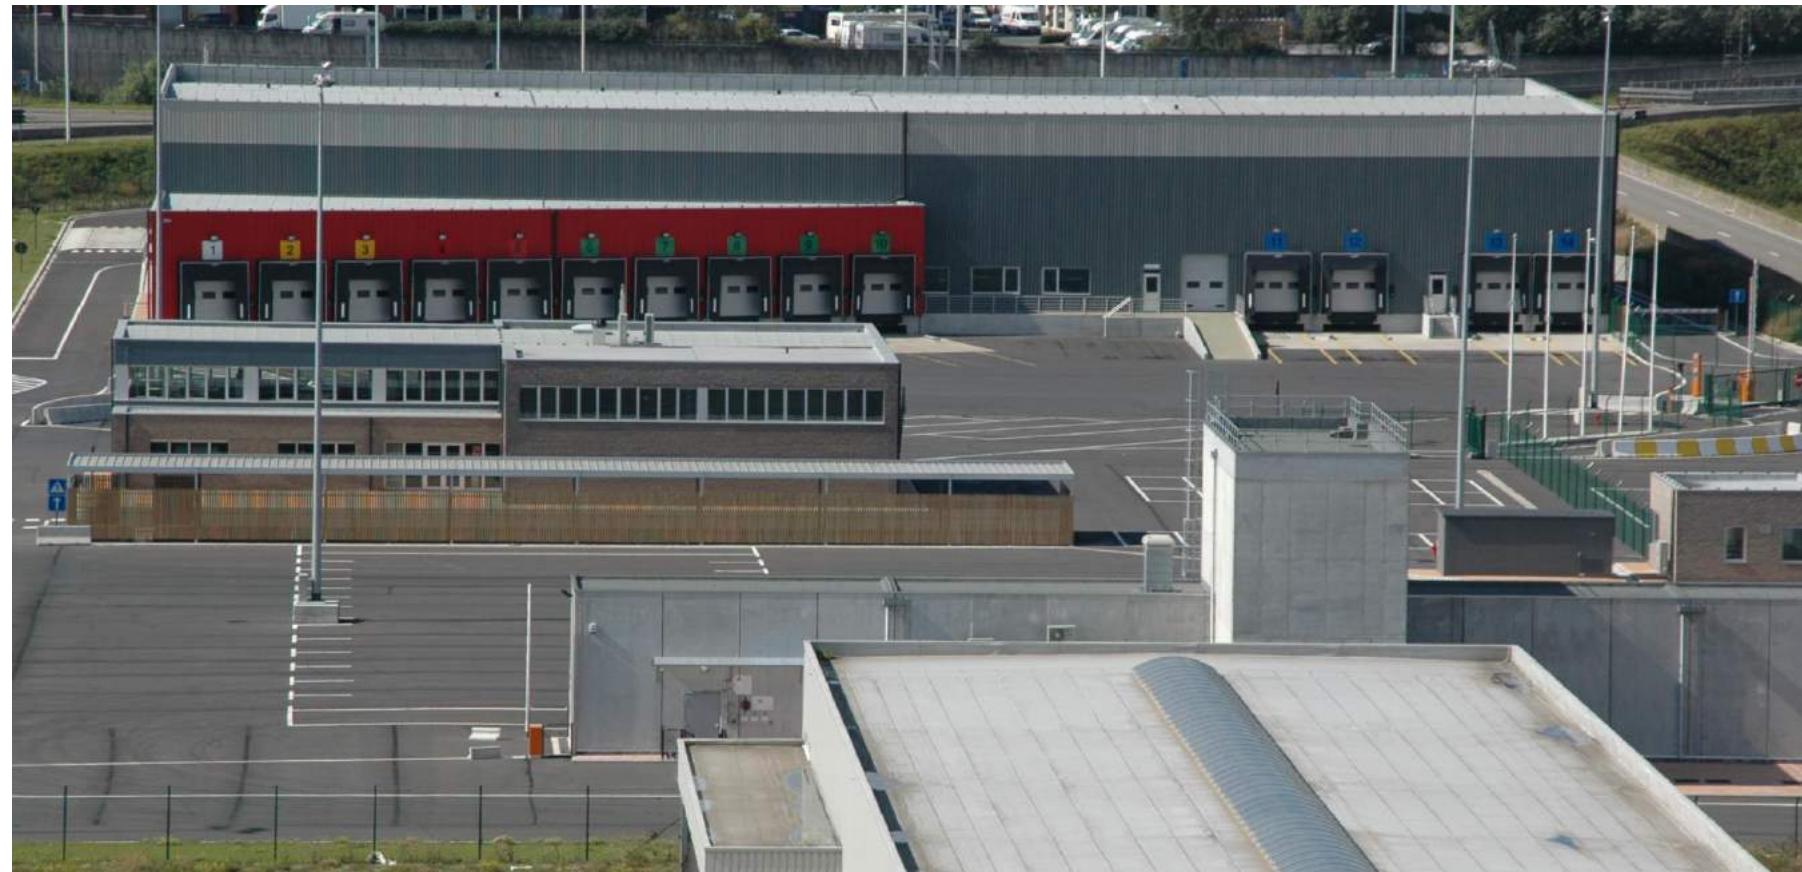

- Drivers do not accompany the cargo
- No delays at immigration check points
- Ensuring a smooth & stable supply chain

Direct connections to Ireland
“Brexit busters”
Delphine and Céline

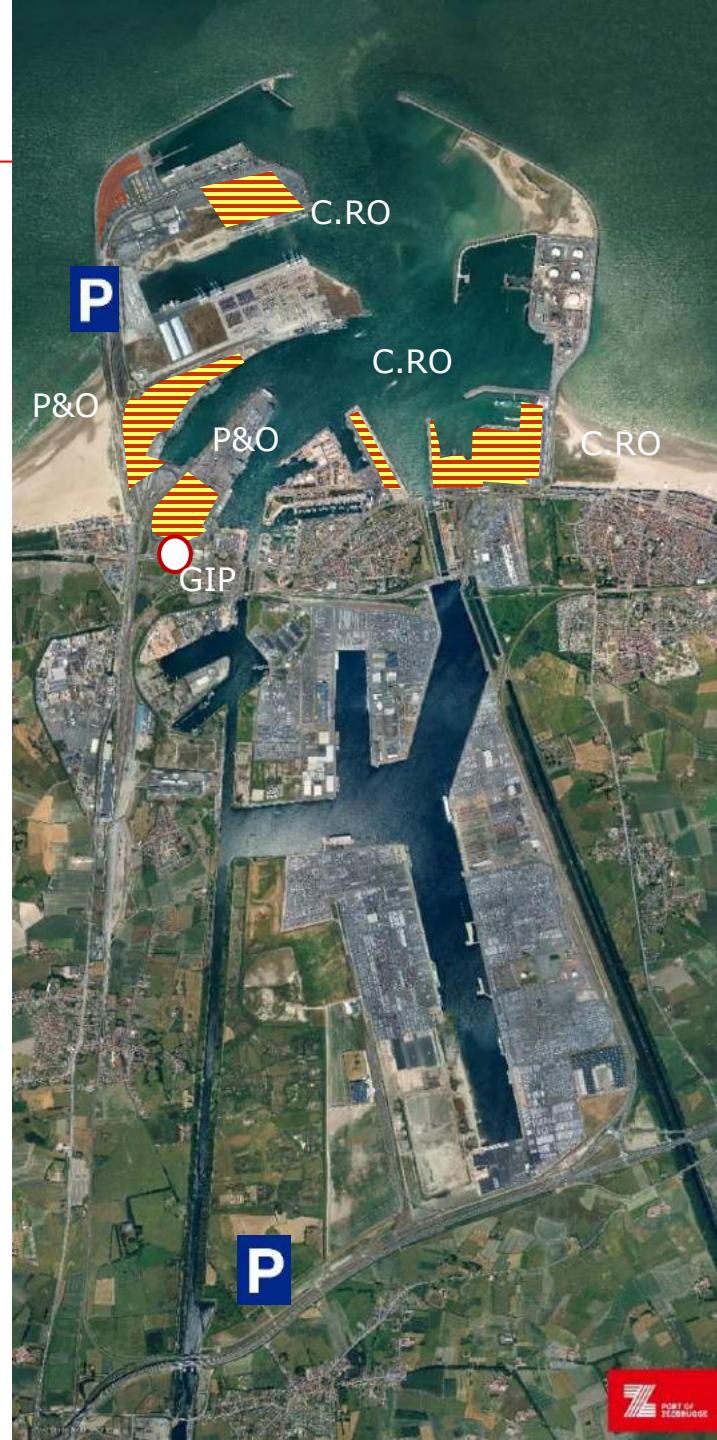

Border Control Post (BCP)

- Ample capacity
- Customs and Food Safety personnel and equipment
- Temperature controlled spaces
- Located close to terminals and warehouses

Ready for Brexit

- Contingency plan to guarantee port accessibility at all times
- Collaboration between Port Authority, Customs, Food Safety Agency, Police (local and federal) and other public authorities
- Traffic plan for the port area
- Circulation plan for the broader region
- Temporary overflow parkings in the port area
- A system of sign posts will guide the traffic.
- "green lanes" (RX/Seaport)

RX SeaPort - your Brexit gateway -

1. BOOKING

Make sure you have a valid booking with your ferry operator

2. CUSTOMS NOTIFICATION

Provide pre-notifications of customs data with [RX/SeaPort](#)

3. GREEN LIGHT CHECK

Check [RX/SeaPort](#) dashboard if your cargo reached the **GREEN LIGHT** status

from and to Zeebrugge
In 3 steps

1. BOOKING

Make sure you have a valid booking with your ferry operator

Zeebrugge -> UK

You can make your booking with the different ferry operators & short-sea operators, like you did **before Brexit**.

This procedure does not change.

Without booking the haulier will not be allowed to proceed to the terminal.

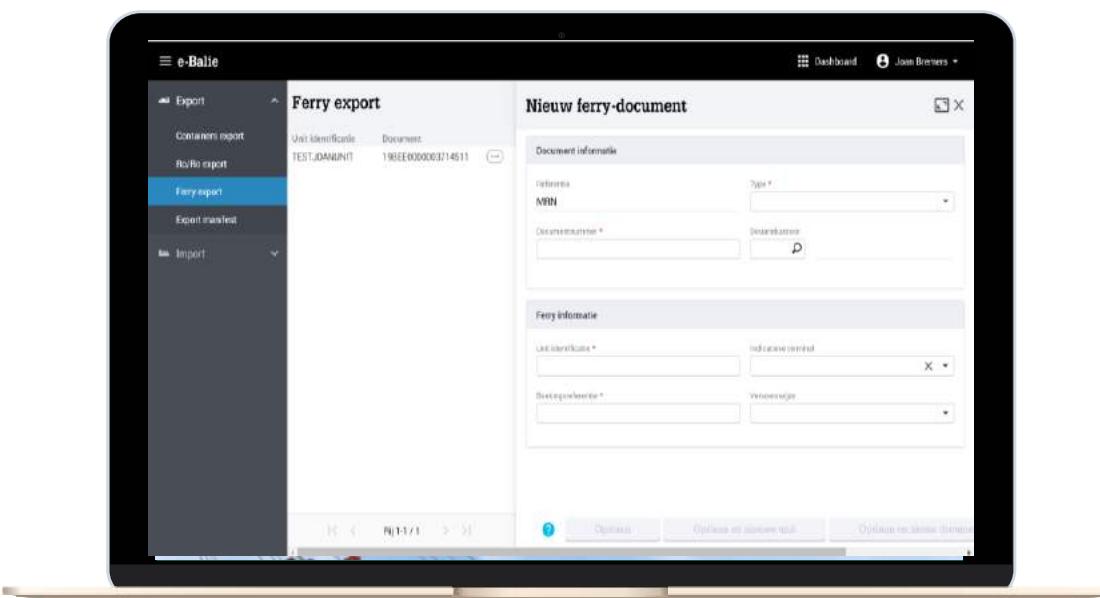

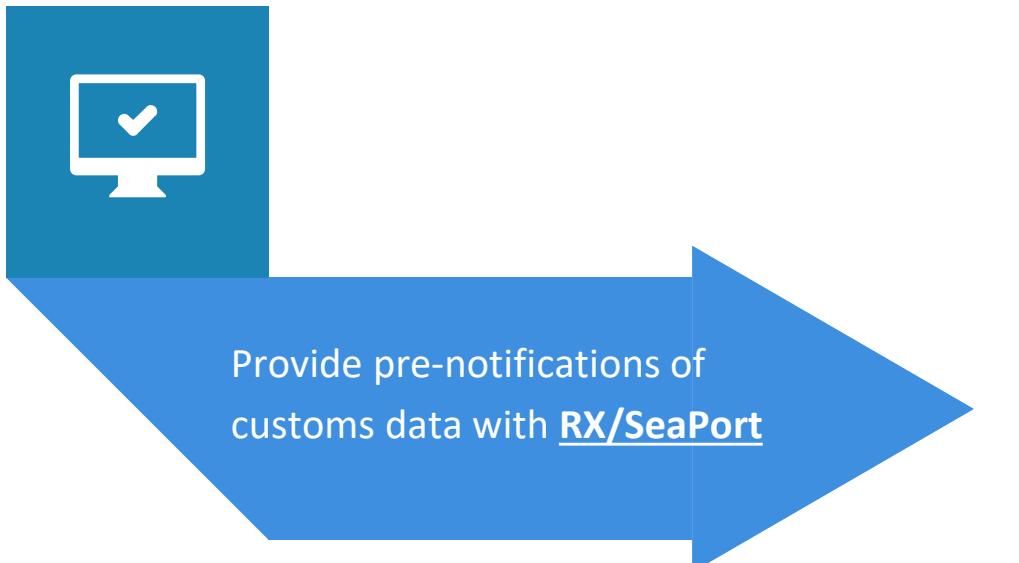

UK -> Zeebrugge

You can make your booking with the different ferry operators & short-sea operators, like you did **before Brexit**.

You will also be required to provide detailed information about your cargo for safety and security purposes.

Without booking the haulier will not be allowed to proceed to the terminal.

2. CUSTOMS NOTIFICATION

Zeebrugge -> UK

The customs details that are linked to a booking must be pre-notified via the e-Desk ferry application of RX/SeaPort.

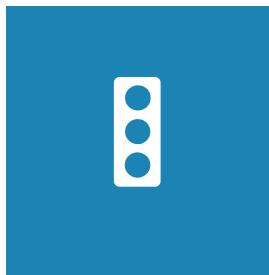

Without the mandatory pre-notification of the customs data, the haulier will not be allowed to proceed to the terminal.

UK -> Zeebrugge

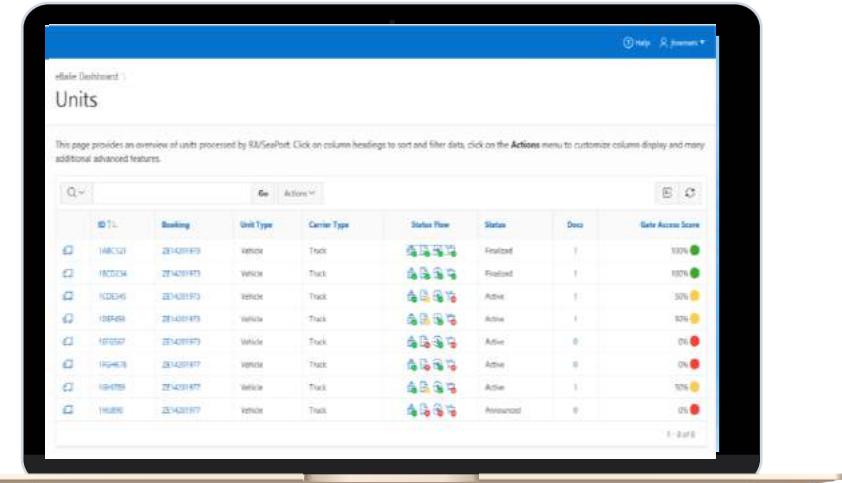

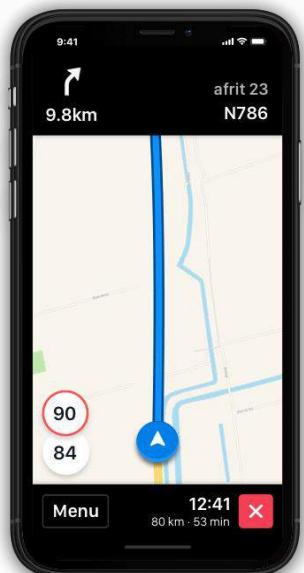

The terminal operator is informed of the customs status of your cargo via the e-Desk ferry application of RX/SeaPort. Based on that information, the cargo can be released for transport.

The cargo cannot be collected without this mandatory pre-notification.

3. GREEN LIGHT CHECK

Check **RX/SeaPort** dashboard
if your cargo reached the
GREEN LIGHT status

“GREEN light” check

- You should always pre-check your access via the RX/SeaPort dashboard.
- Truckers can easily check whether previous steps are executed via the RX/SeaPort dashboard on their smartphone.

Circulation plan Zeebrugge

- Cargo with a **RED** light will not be permitted in the Port of Zeebrugge.
- Cargo with a **GREEN** light may immediately present itself at the gate of the relevant terminal.

WHICH TOOLS OFFERS RX/SEAPORT FOR BREXIT?

BREXIT WIZARD

- In this wizard we put the focuss on the impact of the Brexit on the logistic flow, therefore the transport of the goods which go from exporter via a Belgian port to the UK.
- Step by step, the whole process is shown on how to transport to and from the UK in a post Brexit period. This explained for companies which dont have any knowledge of customs

E-desk FERRY Pre-notification of customs data

- Via e-desk the user (forwarder, exporter, haulier ...) notifies the terminal operator of the arrival of the load by mentioning the following data: type document, customs office of exit, MRN-number, unit number, terminal, bookingsreference...
- The terminal operator continuously pulls this data. Other users will only be able to see the data of which they are owner

RX/DASHBOARD

- via the RX dashboard the importer, his representative and the haulier receive timely insight into the different statuses of their cargo, via a handy track & trace system.
- via the RX dashboard the exporter, his representative and the haulier receive timely insight into the different statuses of their cargo, via a handy track & trace system.
- 'Green lights' check:
 - Green light (booking+MRN ok)
 - Orange light (booking ok + no MRN)
 - Red light (no booking + no MRN)

Concrete advantages

Goals:

- Zeebrugge identity: work on the needs for a port with mixed shortsea and deepsea RoRo, Ferry and container traffic.
- It is specifically aimed at transport via Zeebrugge: how to help solve traffic problems, reduce administrative work, etc
- Traffic EU <-> UK through Zeebrugge after implementation of new UK border controls as smooth as possible.

Advantage through:

- Avoid traffic jams (through accurate real-time info)
- Reduce administrative work, follow-up (through dashboard, integration with Production Systems)
- Avoid fines, extra costs (through information from customs, FASFC)

- aim is to make cargo flows as efficient as possible after Brexit, by facilitating data exchange**

Vision/Mission

VISION

Being the Center of Excellence
on digitization for the
Port (community) of Zeebrugge.

MISSION

Make Zeebrugge a real
"Smart Port".

OUR CORE PRINCIPLES

We operate as an **independent** and
reliable partner

We focus on offering **maximum added
value** for our community

We always keep the **accessibility** of our
services in mind

We believe in a
network of networks, and strive for
maximum interoperability

Circulation plan Zeebrugge

Purpose :

Smooth passage for all traffic from all companies

The terminals have their own access policy

Also attention for residents, emergency services, employees, tourism, local traffic, ...

Keep a border control post (BCP) available at all times

2 waiting zones for transporters to obtain green status reorientation

Accessibility Zeebrugge village guaranteed

Terminals short sea UK

2 companies with fixed short sea connections to the UK

P&O en C.Ro

New Year = General quiet time (also without Brexit).
Stockpiling for Christmas

P&O closed until 2 Jan 06.00hr
C.Ro expects very limited load

UK load:
+/- 2400 loads
normal day

+/- 3000 loads
peak

Green light – Green lane

Basis: The terminal itself implements the dynamic access policy

The terminal communicates with the carrier and gives a status red (not in order) or green (in order)

Non UK freight = green light or dynamic decision

UK freight (booking + customs ok) = green light
red light for the others

Green Lane is the data presentation (Rx Seaport) at a distance of this decision

Status red: the driver must return to the outside
(via segregated route at terminal = loop)

Status green: the cargo is deposited/collected

Possession and data on the CMR are decisive.

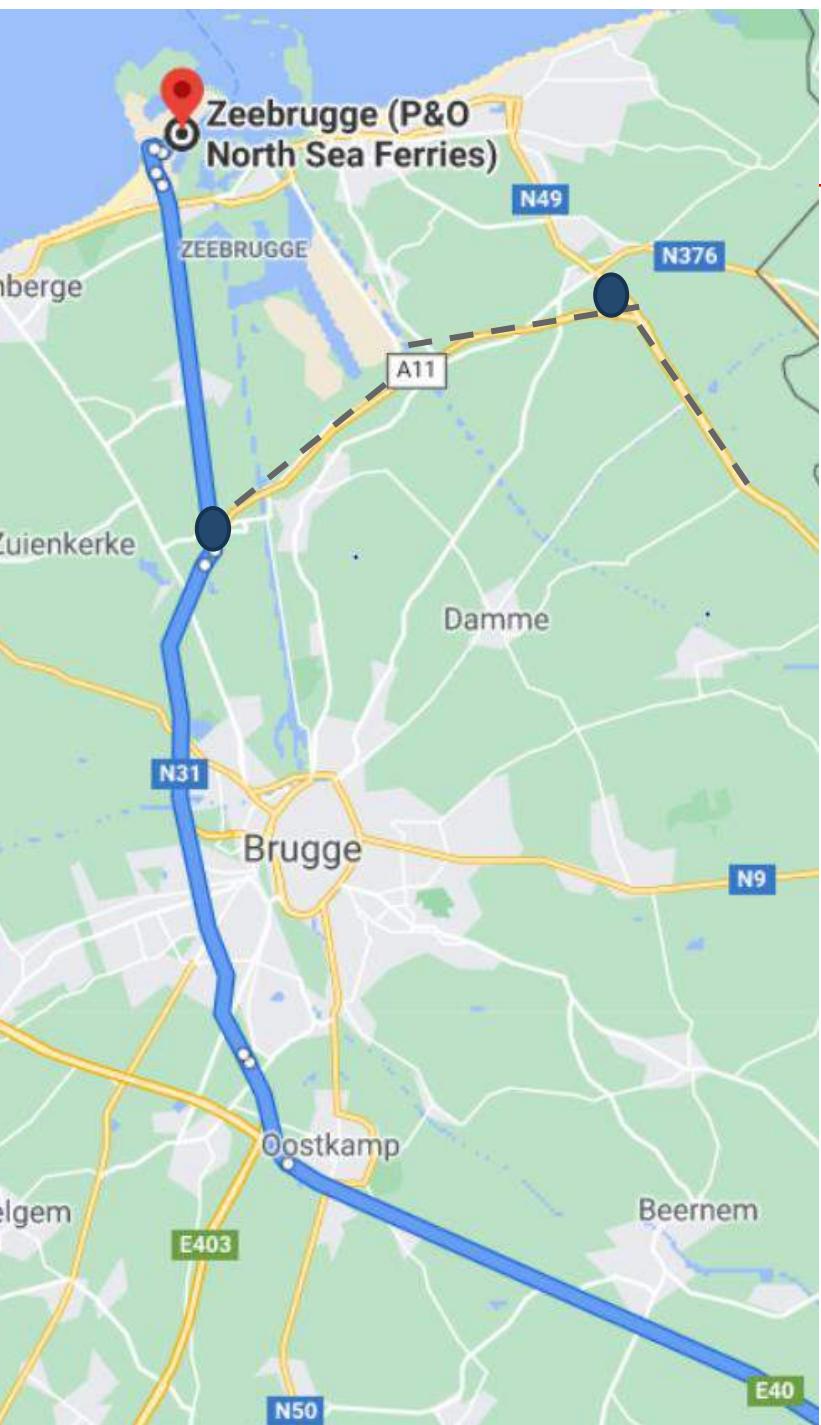

All traffic on normal roads

See Truckmeister app on your smartphone

Indications from Brussels - Ghent and Antwerp Ring Road

Port of Zeebrugge
NO BOOKING=NO ENTRY

Recommended P&O flow

Priority: via E40

Dynamic indication on the motorways

Port of Zeebrugge
P&O via N31

Secundary:

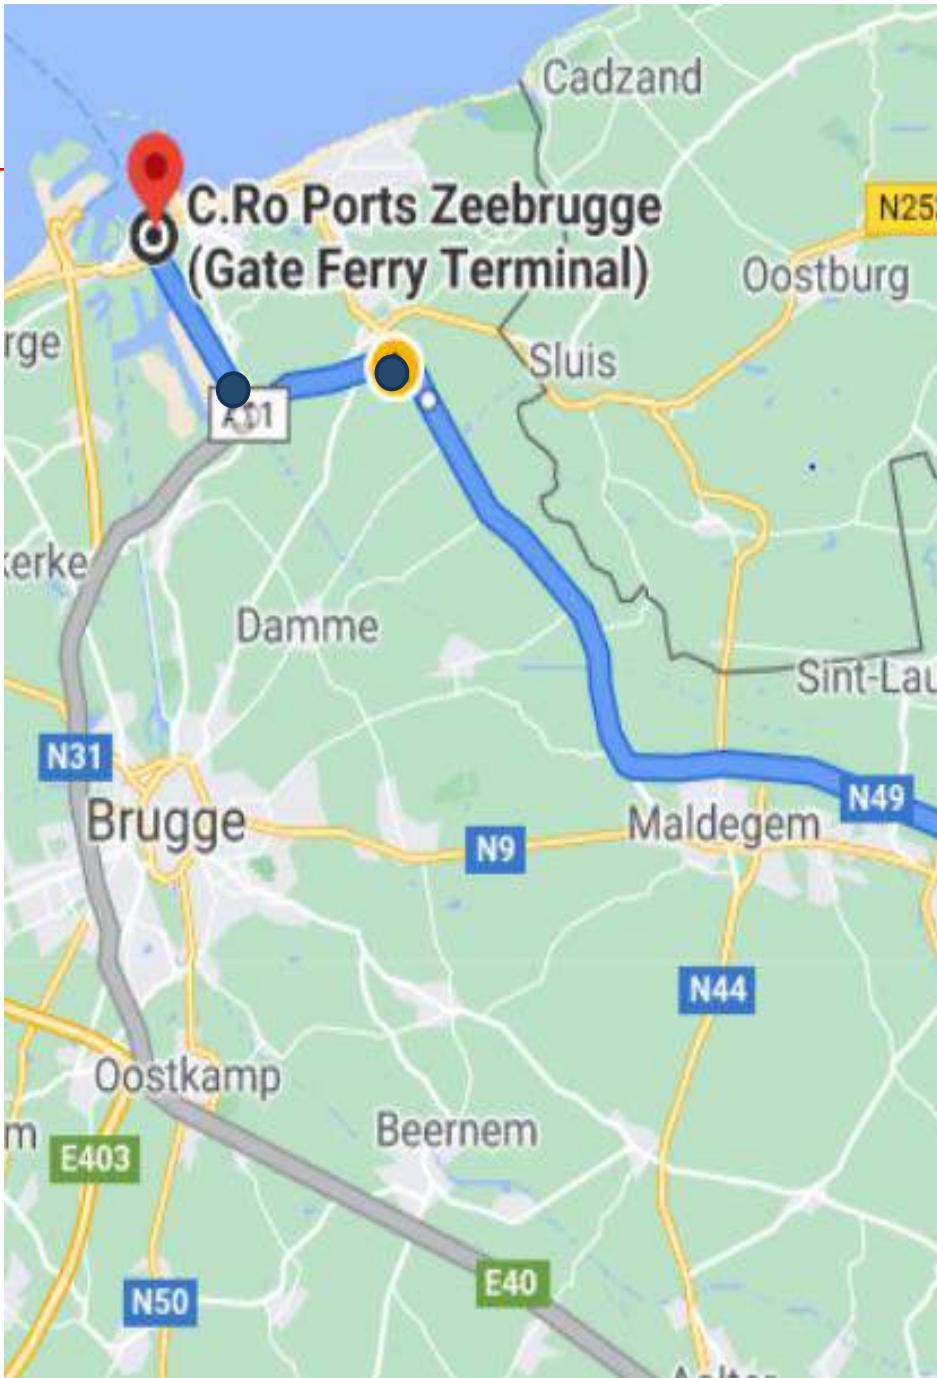

via E34/N49 along the A11 to N31

Port of Zeebrugge
P&O &C.Ro via A11

For status red : Brexit Zone Western breakwater

Recommended flow C.Ro Brittania dock

Priority: via E34/N49

To A11 - N350 (Alfred Ronsestraat) -
Minervarotonde - Isabellalaan - C.Ro

Port of Zeebrugge
P&O + C.Ro via A11

Secundary:

via E40 (towards Brugge) - A11 - N350

Port of Zeebrugge
C.Ro 608-613 via A11
P&O + C.Ro 127-129 via N31

For status red

Temporary Brexit-zones in the port area

Fliers at the terminal with instructions to the driver
To Brexit zone 1

Location: Western Harbour Breakwater
Capacity : **80 places**

Priority for P&O freight
100 places on P&O itself

Installation Covid proof
Access control
Surveillance/Security
Lighting
Sanitary blocks (toilets and showers)
Catering
Waste management
Internet

Temporary Brexit-zones in the port area

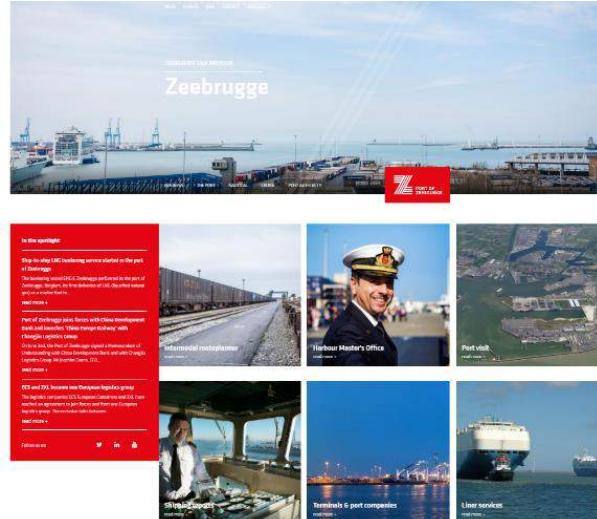

Flyers at the terminal with instructions to the driver
To Brexit zone 2

Location: Havenrandweg Zuid
Capacity : **193 + 160 along Koffieweg**

Priority for C.Ro cargo

Installation Covid proof
Access control
Surveillance/Security
Lighting
Sanitary blocks (toilets and showers)
Catering
Waste management
internet
